

MeshConnect EM35x Programming Fixture

CEL's MeshConnect EM35x Mini Modules Programming Fixture is a programming assembly designed to be used with the CEL ZICM35xSPx MeshConnect™ Mini Modules. It is useful for production programming or during application development when multiple firmware images are required to be loaded into a CEL Mini Module for testing and debugging. The programming assembly must be used in conjunction with an Ember Debug/InSight Adapter (ISA3) from Silicon Labs.
